EXAMINER'S AMENDMENT

Continued Examination Under 37 CFR 1.114

(1)

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 11, 2007 has been entered.

(2)

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: reference sign "48a" for bevels mentioned in the description is not included in Fig. 18C.

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

(3)

The following is an examiner's statement of reasons for allowance: The closest prior art of record, IBM Technical Disclosure Bulletin (Cochran et al.) discloses a stacking complex comprising handlers for trays (sheet supplier with trays), alignment plate having pins, stacking carrier (laminator) on which green sheets are laminated after each is aligned at the alignment plate, vacuum transfer head (conveyor) which conveys green sheet to the alignment plate, transfer head (conveyor) which transfers each green sheet from the alignment plate to the

stacking carrier and controller. The prior art of record does not disclose or suggest modifying the apparatus of the prior art of record to provide the laminator for laminating green sheets with a plurality of guide pins to penetrate pin insertion holes in each green sheet lined with carrier film while laminating green sheets and to provide a compression bonder configured to press each green sheet lined with carrier film placed on the laminator, to peel off the carrier film and to discharge the peeled carrier film to a film discharger, as claimed. As set forth in the specification a compression bonder configured to press each green sheet lined with carrier film placed on the laminator, to peel off the carrier film and to discharge the peeled carrier film to a film discharger comprises an upper mold, compression bonding member and gripping mechanisms, some of which are arranged on a movable section to move the gripping mechanisms to a film discharger.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin Curtis Mayes whose telephone number is 571-272-1234. The examiner can normally be reached on Mon-Fri 7:30 AM - 4:00 PM.
